## **SIAS RDB Registration**

**December 2022**

Note- this document abides and refers to the Rwandan law No 010/2021 of 16/02/2021 determining the organization of education on matters regarding the types of Higher Learning Institutions

## **One- Background of SIAS**

SIAS was established first in November, 2022 by an RDB registered company called 'Inspiration Economy Limited'. In order to show its readiness to operate, SIAS was registered again directly by a company that carries its name directly, The goal of the SIAS's existence besides the delivery of a robust accredited academic program is to create a collaborative research and projects environment that would lead to producing a generation of socioeconomic leaders that would deliver effective projects and inspired research.

Appreciating that it needs to show its purpose and presence in the community, since March 2023, SIAS started to run workshops in the areas of specialty to attract the potential stakeholders and make them become strong partners in this socioeconomic development focused initiative. Once its accredited by the HEC, SIAS would change its status in RDB from a private consultancy entity to a private academic specialised institution, as per the requirements of the law No 010/2021 of 16/02/2021 determining the organization of education on matters regarding the types of Higher Learning Institutions, which determine requirements for establishment each type of the Institution, and the ministerial Order No 001/MINEDUC/2021 of 20/10/2021 determining standards in Education and establish infrastructures and facilities adequate for academic activities.

In SIAS we are committed to be the most recognized postgraduate specialised institution in Rwanda, then in East Africa and the World gradually. We also would be the leading socioeconomic research and development hub in Africa.

SIAS graduating students would be able to present their thoughts cogently, develop, lead their targeted communities, and work well in teams for the development of their country. SIAS must ensure that its students and researchers are able to analyze and evaluate important trends in their communities during their academic life, comprehend how the world is changing, and cope with the dynamics of change.
